## FO. Arnold F. Gerding Escapes Airplane Crash

F/O Arnold F. Gerding, son of Mr. and Mrs. Joe Gerding Sr., was one of two survivors of the crash of a Canso flying boat which crashed into the waters of Britannia Bay near Ottawa late Monday, July 23. Mrs. Gerding received a wire Tuesday morning that Arnold had been admitted to hospital and was listed as "seriously injured." Tuesday afternoon a second wire was received stating that he had been discharged from hospital, following treatment for shock. Arnold was co-pilot of the craft which was formerly engaged in anti-submarine patrol work off Iceland. Of the seven aboard the flying boat at the time of the crash, five are missing and presumed dead including Flt./Sgt. S. W. R. Brown and Flt./Sgt. L. M. Whitehead, both of Calgary. A wire from Arnold Wednesday morning stated that he was safe and well. It is believed that this was the final training flight before going on a special mission to Davis Strait where the crew would chart and take pictures of a newly found island.

## VULCAN RINK MADE GOOD SHOWING AT NELSON 'SPIEL' WILL BE BACK IN 1946

The Vulcan rink, comprising R. M. Patriquin as skip, J. Wolfe, third; K. McLean, second and C. W. Loose, lead, have returned from Nelson where they participated in Canada's first summer bonspiel. The rink got away to a good start, winning the first four games, but at that time Mr. Wolfe was called home and while they carried on with three men they were unable to win any more games. All report a wonderful holiday and are looking forward to attending again next year. They found Nelsonites very hospitable and thoroughly enjoyed the boating, bathing and fishing in addition to the curling.

The following is an extract from the July 5th edition of the Nelson Daily News: "One of the prairie rinks, R. M. Patriquin's from Vulcan, Alta., had as its highlight the counting of a seven-end. It got this on the Donald MacDonald rink from Trail on Thursday morning in the Kootenay Challenge competition, on the eighth end, making its score 11 to MacDonald's 14. The bell rang during the ninth end, and with MacDonald lying shot, the end was not completed. The Patriquin rink made a good start in the 'spiel', winning its first four games, but when Jack Wolfe, its third, was called back to Vulcan by wire on Tuesday, it played under a handicap for the rest of the 'spiel'."

Your bank is a link between the man  
in Canada who has goods and services  
to buy or sell, and his customers abroad.

Through its commercial correspondents and business connections all over the globe, your bank often has the specialized information necessary to bring buyer and seller together, no matter how far apart they live.

Your bank is able to gather information on the reliability of foreign firms, to handle letters of credit, to arrange the complicated exchange of funds, performing an individual, intricate and inexpensive service to importers and exporters alike.

This feature of Canadian banking has a direct bearing on your welfare. It has, through many years, developed the sale of Canadian goods abroad, resulting in more jobs for Canadian men and women.

EACH YEAR before the war, more than 150,000 people thronged the Indianapolis Speedway to witness the supreme test of tire mileage and safety, the annual 500-mile race.

Recently, under the supervision of the American Automobile Association, Wilbur Shaw drove the 500 mile course at an average speed of 100.34 miles per hour in a race car equipped with STOCK Firestone synthetic rubber tires, the same as you can buy at any Firestone Dealer's.

Imagine the punishment those tires took as they pounded over the rough brick and grinding asphalt... 500 miles at speeds up to 135 miles per hour... equal to 50,000 miles of ordinary travelling.

When you buy new tires, remember—Firestones are the only synthetic rubber tires made that are safety-proved on the speedway for your protection on the highway.

WARNING: The tire situation is still critical. You should continue to observe the wartime speed limit and all other fundamental precautions for conserving the tires that are now on your car.

### Halifax Takes Another Shock

The city of Halifax has suffered more greatly than any city of Canada from developments incidental to war. In the first war it was rocked under explosions. It was the victim of a looting riot a few months ago, and on July 18 the city was shaken with a series of explosions from a munitions depot at Bedford Basin. Thousands of people were evacuated from their homes, and when they returned it was mostly to windowless houses. There were a number of casualties but fewer people were injured than was anticipated. First explosions occurred when ammunition stored on a navy jetty blew up, and when the fire reached some of the magazines later explosions resulted. The main magazine said to contain 50,000 depth charges escaped. This great magazine covers a large area of Bedford Basin, and most of the buildings housing explosives are surrounded by great mounds of earth. There is little population within a mile or two, and Halifax is about four miles away. The damage was mainly to the northern part of Halifax, from which thousands of people were evacuated. Store owners the following morning took up the task of cleaning up broken glass.

The explosion was felt at St. John's, N.B., 125 miles away. The entire population of Dartmouth, 17,000 people, were evacuated. It was the north end of Halifax which suffered most in the explosion of the first war.

It was said that the results in the harbor were worse than a naval battle.

The forest area of Canada now being used to produce pulp, paper and newsprint for the United Nations, is equal to the combined areas of the British Isles, France, the Netherlands, Denmark, Norway and Sweden.

Claims for V. Day riot damage filed by Halifax business men now totals the sum of \$1,250,000.

## MEN FOR HOME BUILDING MUST BE SECURED

Home building is highly essential to overcome pressing housing shortages, and to provide dwellings for the Forces as discharged.

Shortages of workers for building homes and for producing the building materials are threatening to impede Canada's program for the construction of 50,000 homes as soon as possible.

All men experienced in home building or in producing building materials, who are not now working in either of these industries, are urged to apply to the nearest office of the National Employment Service immediately.

Men experienced at home building or producing supplies, if now in other essential work, will be given permits to work at jobs which will assist the house building program.

All men, not now at house building nor producing supplies, who can fill a job in this program, are urged to answer this call.

Apply at once at the nearest office of the National Employment Service.
